WISEdata is the system districts must use to share data with DPI for state and federal reporting, including Wisconsin School and District Accountability Report Cards and Federal Accountability Report Cards (ESSA). The WISEdata Service will assist school district personnel in reviewing and understanding the many reports within WISEdata Portal. Participation in this package will increase the understanding and importance of using a uniform process for data collection and entry. Program participants will also be guided to understand how data is reviewed and validated prior to DPI Snapshots and uploads.

Level 1

Basic Service

- Shared WISEdata Portal recorded training sessions with administrators, administrative assistants, and data teams related to data collection for WISEdata Portal.
- Two Snapshot Ready workshops by CESA 4
- One Year End Data Workshop to finalize year end data in a timely manner
- Review of live-time data to identify data errors prior to a Snapshot
- Consultation on WISEdata errors and exports as needed via phone, email, or Zoom

Level 2

Personalized Service

- All of the items in the Basic Service PLUS,
- Personalized Service of two days designed for districts to create a process and procedures to collect accurate live data for state/federal reporting. Teams will learn about the tools and resources to check school data. Teams will develop communication tools to assist with verification processes of the snapshots.
