The Special Education Director Services program provides an array of on-site and CESA 4-based support options that may be tailored to meet the specific needs of district administrators, directors of pupil services and/or special education director/designees, building principals, and staff.

Services result from individual district needs for a district-assigned director of special education/pupil services for the management and direction of special education departments and pupil services within that district for short- or long-term durations.

Level 2 Customized Service is designed to provide consultation and technical assistance for special education services in specific short-term areas of need. This level of service is meant to provide support to a district's DPI-identified pupil services and/or special education director/ designee. Services include but are not limited to:

- Site visits to review programs, identify district needs, and advise administrators regarding changes
- Dissemination of informational updates through various means to keep district personnel informed about new special education regulations, guidelines, and requirements
- Provision of specific technical assistance on procedural issues and policy development, SPP, and LPP data
- Provision of in-district services (e.g. in-service presentations, program evaluations, and advisory committee or school board presentations)
- Assistance with the State Performance Plan and local education plans, analysis of special education data, Self-Assessment, and DPI Continuous Improvement Focused Monitoring
- Provision of legal interpretations for administrators and directors on specific special education issues
- Provision of targeted support in special education performance indicator improvements
